Bay Distance	5	5	5	5	5	5
Aluminum profile (mm)	68×122	108×150 88×166	110×202 90×187	112×203	112×203 112×252	113×259 112×252

Accessory options complete the tent system.

Selected accessory categories from the existing EXPOMAX catalogue, reorganized for the new product book.

1
三明治墙体
Sandwich hard wall

2
ABS墙体
ABS solid wall

3
卷帘门
Rolling door

4
空调
Air condition

地板
Flooring

布幔
Lining

玻璃幕墙
Glass walls

玻璃门
Glass door

承重框
Weight box

承重盘
Weight plate

Real projects show how the same structure system adapts to different needs.

Memphis Workshop

18m x 30m temporary factory workshop in Tennessee.

China Warehouse

8,000 sqm storage tent project with four independent structures.

Liu Cixin Exhibition

30m x 60m themed exhibition venue with custom fabric.

Africa Wedding

20m x 50m elegant enough for formal events while still performing as a reliable temporary structure outdoors.

Overseas buyers need clear packing, shipment and installation support.

01 Drawing confirmation

Confirm size, enclosure, doors, wind or snow needs and site conditions.

02 Production and inspection

Prepare aluminum frame, connectors, PVC covers and accessories by project list.

03 Packing and loading

Bundle profiles, protect accessories, mark packages and provide loading photos.

04 Installation support

Provide drawings, remote guidance and engineer support when required.

FACTORY LOCATION

Factory Location And Port Access

Located in the Yangtze River Delta manufacturing cluster, close to key sea ports.

Factory address

No. 176 Lujiatou, Yaoguan Town, Wujin District,
Changzhou, Jiangsu, China

EXPOMAX (CHINA) EXHIBITION TENT CO., LTD

Taicang Port

Approx. 130 km

Fast regional export option

Shanghai Port

Approx. 190 km

Major international container hub

Ningbo-Zhoushan Port

Approx. 300 km

Flexible routing for sea freight

Port distance figures follow the logistics information used on expomaxtent.com.

In-House Production Process

From aluminum profile preparation to PVC fabric processing, each step is handled by trained workers using dedicated equipment.

Measuring & Positioning

Profile Cutting

Drilling

Grinding

Steel Parts Welding

Fabric Cutting

High Frequency Welding

Sewing

Inspection, Packing And Shipment

Packing is planned around project size, component length and loading method, helping customers receive complete and traceable materials.

PVC cover inspection and dimension checking

Aluminum profiles and covers packed for transport

Container loading and export preparation

- Profiles and steel components are bundled and protected to reduce handling damage.
- PVC covers are folded, checked and packed according to project lists.
- Container loading is arranged for efficient volume use and easier unloading on site.
- Packing photos and loading records can be provided before shipment.

A faster quotation starts with six project details.

01 **Span and length**

Required clear width, total length and usable area

02 **Eave height**

Forklift, vehicle, sports or event clearance requirements

03 **Use case**

Storage goods, event layout, sports court, banquet or work process

04 **Location**

Country, city, wind, snow, sun exposure and site photos

05 **Enclosure**

Open sides, PVC walls, hard walls, doors, windows and insulation

06 **Timeline**

Expected delivery, installation date and use period

Send the project size, use case and destination. We will help shape the first solution.
